Senior product designer specializing in data visualization, reporting, and complex SaaS workflows. Combines hands-on research, interaction design, and product strategy to help customers understand their data and take action. Leads design across multiple product teams, using AI to support research, prototyping, and implementation.

EXPERIENCE

ActiveCampaign | Senior Product Designer

July 2024 - September 2026 | Remote, US

- Cut campaign registration failures from 30%+ to 3% by redesigning the self-service 10DLC registration flow for SMS marketing, removing a critical onboarding barrier to drive customer activation.
- Drove #1 engagement among ActiveCampaign AI agents within 5 days of launch by redesigning audience-segmentation discovery and agent traces, advancing key milestones toward the AI-native cohort ARR target.
- Secured CPO endorsement and aligned 6 cross-functional workstreams by establishing the AI-driven SMS marketing product vision tied directly to company ARR growth goals.
- Accelerated design-to-production delivery for end-to-end billing and AI monetization by leveraging Lovable prototypes for executive alignment and using Cursor to write and merge front-end code (MRs) under aggressive timelines.
- Saved ~3 hours per week in manual operational overhead by scaling DesignOps across EPD. Ranging from building a centralized research hub to implementing a custom Claude workflow to automate weekly customer insights synthesis.
- Standardized high-value AI reporting capabilities across CAMP design systems by defining data visualization components that serve as core foundational patterns for agentic workflows.
- Delivered 6 major product features across distinct cross-functional teams, aligning engineering and product leadership to translate complex customer needs into cohesive product experiences.

Nielsen Media Research | UX Designer

January 2022 - July 2024 | Chicago, IL

- Designed data-rich B2B SaaS experiences for advertising professionals, translating complex analytics into clear workflows and reusable interaction patterns.
- Conducted customer interviews and usability tests to inform product strategy; facilitated design reviews and workshops to align product and engineering partners.
- Reduced UI bugs by 20% through developer design-system training and lean UX and visual audits integrated into the scrum process.
- Led UX contributions and prototyping for the Nielsen One demo at the 2023 Cannes Lions Festival of Creativity.

Trova AI | Product Designer

May 2021 - December 2021 | Part-time, Remote, US

- Designed an AI-driven search application with product owners, developers, and data scientists, supporting the startup's seed-funding effort. Introduced usability testing and product analytics into the development process.

Personify Inc. | Product Designer

March 2020 - January 2021 | Part-time, Remote, US

- Researched, tested, and delivered a website redesign associated with a 34% increase in sales and a 184% increase in downloads.
- Designed the Presenter desktop MVP through iterative usability testing, partnering with Product, Visual Design, and Engineering through launch.

Foxconn Technology Group | Product Development and Marketing

February 2017 - July 2019 | Taiwan

- Managed international product-development projects that launched five products overseas; translated market research and competitive analysis into product recommendations.
